Subject: Microsoft Settlement

I believe the Microsoft Settlement is a bad idea.

One idea that stands out in my mind is that there is no proposed monetary amount that Microsoft is being fined. They were found guilty of a Monopoly in operating systems market and guilty of overpricing their operating system which I think should translate into a hefty (it must exceed the amount of overpricing X number of units sold as to convince them not to continue the practice in the future.)

Thank you for your time and attention
